P2P CLOUDS

About P2PClouds

P2PClouds is a product-based technology company specializing in smart, **AI-driven solutions**. We build and run our own software products, including an **AI LMS, CRM, and AI Agents**, used by training institutes, organizations and government-linked bodies, **both nationally and internationally**.

1000+
Products in the market

Global
LMS used nationally & internationally

Bank
Payments & voucher integration

Our Solution

The **P2PClouds AI LMS** automates the complete learning flow, from enrollment and classes to recordings, fees and performance insights, so your team can focus on **teaching and growth** instead of admin work.

The Challenge

Most training institutes still run their learning operations manually, which costs time, staff and money:

- ✕ Scheduling classes and sharing links by hand
- ✕ Uploading and sending recordings manually
- ✕ Student records spread across sheets and WhatsApp
- ✕ No bank payment integration for fees
- ✕ No fee voucher integration
- ✕ No real-time updates on payments and attendance
- ✕ Fee tracking and follow-ups done manually
- ✕ No real-time view of student performance
- ✕ Large admin team needed to keep things running
- ✕ No automatic email alerts or fee reminders
- ✕ Meet / Zoom links and recordings handled manually
- ✕ Reports prepared by hand in spreadsheets

Key Features

AI

Smart Content Delivery

Deliver videos, documents, quizzes and assignments in a structured, AI-assisted learning path for every student.

▶

Automated Classes & Recordings

Class meetings are scheduled automatically on Google Meet or Zoom, and recordings are shared with students after each session.

◎

Course & Student Management

Manage courses, batches, enrollments and student profiles from a single dashboard.

Rs

Fee, Bank & Voucher Integration

Bank payments and fee vouchers are integrated, with real-time payment updates and far fewer follow-ups.

↗

Real-Time Performance Insights

Instructors and admins see attendance, progress and assessment results live, to support students early.

★

Partial White-Label Branding

Your institute's logo is shown on the portal, so students see your brand, powered by P2PClouds.

G

Google Meet, Zoom & Workspace Integration

Connects with Google Meet, Zoom and Google Workspace to automate meetings, calendars and recordings.

@

Email Alerts & Reporting

Automatic email alerts for classes, fees and updates, plus detailed reports on students, attendance and payments.

▢

Mobile-Friendly

Students and instructors can learn, teach and track progress from any phone, tablet or laptop.

✓

Secure & Reliable

Cloud-hosted with role-based access, so every admin, instructor and student sees only what they should.

How It Works

Automated Learning Flow

1 — Enroll
Students register and join their batch

2 — Schedule
Meet / Zoom classes and alerts set up automatically

3 — Teach
Instructors deliver live or recorded sessions

4 — Share
Recordings and material sent to students

5 — Track
Reports on performance, attendance and fees

Before vs. After

Task	Without LMS	With P2PClouds AI LMS
Class scheduling	Manual links and reminders	Automatic
Recordings	Downloaded and sent by staff	Shared automatically
Student records	Sheets and WhatsApp groups	One central dashboard
Fee collection	Manual, no bank or voucher integration	Bank & voucher integrated, real-time
Alerts & reminders	Messages sent one by one	Automatic email alerts
Reporting	Built manually in sheets	Ready-made reports
Performance	Checked at the end of course	Real-time insights
Admin staff needed	High	Minimum manpower

Who It's For

Training Institutes
Run multiple batches and courses smoothly.

Schools & Academies
Manage classes, students and fees digitally.

Corporates & NGOs
Train staff and field teams, and report results.

Government Programs
Scale skills programs with full tracking.

Our Clients

Leading institutes and programs already use our platform to streamline operations and scale.

...and **many more** institutes and organizations, nationally and internationally.

Why Choose P2PClouds

Product-Based Company
We own and continuously improve our platform.

Proven in the Field
Used by institutes nationally and internationally.

Payment Ready
Bank payments, fee vouchers and real-time updates.

Customizable
Features tailored to your institute's model.

Fast Setup
Go live quickly with guided onboarding.

Local Support
A dedicated team based in Lahore.

Implementation & Plans

Implementation Plan

Demo & Requirements Step 1

Live demo and discussion of your courses, batches and workflows.

Branding & Setup Step 2

Portal set up with your institute's logo and settings (partial white-label).

Data & Course Onboarding Step 3

Courses, instructors and students imported and configured.

Training & Go-Live Step 4

Admin and instructor training, then launch with ongoing support.
